## IN THE CLAIMS:

Kindly cancel claim 7, and rewrite claim 5 as follows:

- 1. (Canceled)
- 2. (Canceled)
- 3. (Canceled)
- 4. (Canceled)
- 5. (Currently Amended) An ophthalmologic knife for being guided into an incision formed at an eyeball and for widening the width of the incision, said knife comprising:
  - a handle having an end portion; and
- a blade portion having a flat shape formed at the end portion of said handle, said blade portion having:
  - a front tip,

two cutting edges arranged on both sides of said blade portion in a narrowing manner toward the front tip of the blade portion, and

linear edge without a sharp point disposed between the two cutting edges for guiding the blade portion into the incision formed at the eyeball, having a bottom surface, a top surface, a wedge-shaped cross section formed at a side cross section thereof in a longitudinal direction of the knife, cross sectional slopes formed at both the top surface and bottom surface thereof, and having a greater angle than that of the cutting edges, the top surface having an inclination angle different

from that of the bottom surface.

- 6. (Original) The ophthalmologic knife according to claim 5, wherein the bottom surface of the guide portion has an inclination angle greater than that of the top surface.
  - 7. (Canceled)
- 8. (Previously Amended) The ophthalmologic knife according to claim 5, wherein the flat surface of the guide portion is comprised of a straight portion and an arc portion continuing to the cutting edges on both sides.
- 9. (Previously Amended) The ophthalmologic knife according to claim 5, wherein the guide portion is treated with reflection prevention upon the surface thereof.

Kindly add new claims 10-12 as follows:

- 10. (New) The ophthalmologic knife according to claim 5, wherein the arc-shaped linear edge of said guide portion has an angle of from 36 to 150 degrees.
- 11. (New) The ophthalmologic knife according to claim 5, wherein the arc-shaped linear edge of said guide portion has an angle of from 36 to 90 degrees.
- 12. (New) The ophthalmologic knife according to claim 5, wherein the guide portion has a width of 60% or less that of a maximum width of the knife.
